Dated: 13th Sep, 2008

Dear

The Ministry of Rural Development has been reviewing the operationalization of MIS district wise in States. In this regard kindly refer to Performance Review Committee meeting held on 28-29 August, 2008 in which it was decided that from October'08 onwards, financial releases to the States will be linked with the data that is uploaded in Muster Roll Module and Financial Module.

States have been directed that Muster Rolls of all ongoing works for the current financial year must be uploaded in MIS and flow of funds will be tracked through Fund Flow Statement generated from MIS. To expedite this process, a "Fast-Track Data Entry" option has been made available to facilitate entry of Muster Rolls for all ongoing work and fund flow statement.

Difference analysis of the fund flow statement generated from MIS and the MPRs received from the States was done. It was found that the disbursement on wages reported in the MPRs and from the MIS through the Muster Rolls have wide differences in almost all the districts of your State. An annexure with the district wise analysis has been enclosed for your kind perusal.

It may be noted that from October, 08 onwards processing of the financial proposals will be matched with the physical and financial data from the MIS muster rolls. Therefore it is imperative that the current works muster roll which records the employment details is computerized in to MIS.

It is requested that the operationlization of MIS may be reviewed and status report along with the timeline to operationalize it completely be intimated to the Ministry at the earliest.

Yours sincerely,
(Amita Sharma)

To all Secretaries
